DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II (claims 4 and 5) in Paper No. 6 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5 line 1 and 2, "the sheathed wire side" lacks antecedent basis. In line 3, "the same" lacks antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 5 rejected under 35 U.S.C. 102(b) as being anticipated by Kowalewski (US 3,249,909).

Kowalewski discloses a terminal connecting portion of a sheathed wire (10) comprising a fusiform molded portion (22) which covers and waterproofs the terminal

connecting portion in which a terminal fitting (18) and a bare conductor of the sheathed wire are connected with each other.

Kowalewski also shows the thickness of the fusiform molded portion being continuously reduce such that the end portion of the sheathed wire side has the same diameter as the sheathed wire.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshida (US 4,685,758) and Gerrans, Jr. (US 5,885,108) teach terminal connecting portions having fusiform molded portions. Schwedtmann (US 585,707) teaches a fusiform molded portion covering and waterproofing a terminal connecting portion.
